About the International Journal of Software Computing and Testing

International Journal of Software Computing and Testing invites research papers and article surveys concerning the improvement in software computing and testing. Fluffy computing, cross breed techniques, immunological computing and morphic computing are a couple of points that are remembered for the extension and focal point of the journal.

All commitments to the journal are thoroughly refereed and are chosen based on quality and inventiveness of the work. The journal distributes the most noteworthy new exploration papers or some other unique commitment as audits and reports on new ideas in all territories relating to its degree and examination being done on the planet, accordingly guaranteeing its logical need and importance.
