## About the Annals of Clinical Biochemistry

Annals of scientific Biochemistry is the fully peer reviewed international magazine of the association for medical Biochemistry and Laboratory medication.Annals of medical Biochemistry accepts papers that make contributions to knowledge in all fields of laboratory medicine, particularly the ones bearing on the know-how, analysis and treatment of human disease. It publishes papers on medical biochemistry, clinical audit, metabolic medication, immunology, genetics, biotechnology, haematology, microbiology, computing and management wherein they have both biochemical and clinical relevance. Papers describing evaluation or implementation of commercial reagent kits or the performance of new analysers require tremendous unique records. Until of superb hobby and novelty, research coping with the redox repute in various diseases are not commonly taken into consideration in the journal's scope. Studies documenting the affiliation of single nucleotide polymorphisms (SNPs) with particular phenotypes will not usually be taken into consideration, given the greater strength of genome wide association studies (GWAS). Research undertaken in non-human animals will now not be taken into consideration for publication in the Annals.
