### About the Chemical Today

Chemical Today is India's only magazine which brings in all the news and information about chemistry, chemical industry and chemical end-user industries. Our Chemical Today magazine covers 53 sectors in the chemical industry annually, bringing in an in-depth focus to each sector every month. The magazine has been bringing insights of top global companies with their leaders giving their opinions on the dynamics and trends of global chemical industry.

The magazine keeps you updated on the latest technology trending in the global market with our Cover Stories, Features, Events and Interviews. We have an additional focus on the latest in Green Chemistry/Sustainability, IT In Chemicals, Automation, Logistics and Research giving you myriad of ideas and opportunities to finetune and align your business with global counterparts. We also bring to you the best researches happening in some of the best global research institutes and universities opening your minds to the countless possibilities of expanding your business with research. If that's not enough, we also showcase the talent of budding scientists across the world where they mix imagination with chemistry to create magic that has the power to change the way the megaminds of chemical industry think.
