About the Electrical and Electronics Engineering

Electrical and Electronics Engineering is a dynamic field which involves development and application of modern technology in memory devices, signal processing and data communications, control and expert systems, electromagnetism and telecommunications. The rapid development and innovation in these areas in the last two decades have undoubtedly improved our life a great deal in various ways. In view of the growing importance of this field, IUP has come up with a quarterly journal, The IUP Journal of Electrical and Electronics Engineering.
