About the International Journal of Biotechnology & Biochemistry

The International Journal of Biotechnology and Biochemistry is a prestigious academic publication dedicated to fostering scientific advancements in the fields of biotechnology and biochemistry. As a leading platform for researchers, scientists, and industry professionals, the journal serves as a vital source of knowledge dissemination and collaboration within these disciplines.

International Journal of Biotechnology & Biochemistry:

Biotechnology and biochemistry are interdisciplinary fields that play a crucial role in various sectors, including healthcare, agriculture, energy, and environmental conservation. Biotechnology involves the application of biological systems, organisms, or their derivatives to develop or modify products or processes for specific purposes. Biochemistry, on the other hand, focuses on the study of chemical processes and substances that occur within living organisms.

The International Journal of Biotechnology and Biochemistry provides a platform for researchers, scientists, and industry professionals to publish their original research, review articles, and case studies related to biotechnology and biochemistry. The journal follows a rigorous peer-review process to ensure the quality and integrity of the published work. By publishing in this esteemed journal, authors can showcase their research findings, contribute to the scientific community, and facilitate knowledge exchange.
