Basic Profile | Structural Engineering

Magazine Title: Structural Engineering

Frequency: Quartely

Language: English

Category: Journals on Various Topics

Subcategory: Engineering And Information Technology

Version: Print Version

Edition: Indian - Edition

Subscription Packages for Indian Subscribers

Year(s)	No. of Issues	Print Version
		By Courier / Regd. Post
One Year	4	₹ 1750.00
Two Years	8	₹ 3300.00
Three Years	12	₹ 5000.00
Four Years	16	₹ 6800.00
Five Years	20	₹ 8400.00

About the Structural Engineering

Structural engineering is usually considered as a specialty discipline within civil engineering, but can also be studied in its own right. It is the science and art of designing and making buildings, bridges, frameworks and other similar structures. It has taken a completely different path since the middle of the 20th century. It involves understanding the load-resisting properties of components such as beams, columns, walls, slabs, plates, arches, shells, catenaries, etc., and selecting, proportioning, and connecting different components of a structure to resist the forces and displacements without affecting the safety of the structure. Structural Engineers are responsible for using funds, structural elements and materials creatively and efficiently. In recognition of the growing importance of this branch of engineering, IUP has come up with a quarterly journal, The IUP Journal of Structural Engineering.
